

*Eastern Elegance*  
Bamboo Flooring

**Long Strip Floating  
Vertical Carbonated**

**Product Specifications**

|                    |   |  |
|--------------------|---|--|
| Composition:       | 100% natural renewable Mau Zhu (Hairy) bamboo top wear layer 4.2mm multi-ply core | Transition Moldings<br>Quarter Round 3/4" x 3/4" x 96"<br>6AWBB1 |
| Construction:      | Engineered 3-ply poplar core  |  |
| Size:              | 5/8" x 7-1/2" x 74-13/16"   |  |
| Manufacturing SKU: | LSVCM-A   | Over Lap Reducer 9/16" x 2-3/8" x 72"<br>6AWBV12                 |
| Packaging:         | 31.075 square feet per carton   |  |
| Curing:            | Kiln dried to 6-9% moisture content   |  |
| Treatment:         | Mildew and insect proof   | Over Lap Stair Nose 1" x 3-1/4" x 72"<br>6AWBV17                 |
| Finish:            | Aluminum Oxide 7-coat finishing process   |  |
| Flammability:      | Passes Class I Flammability Standards   |  |
| Warranty:          | 25 Year Residential Warranty<br>5 Year Light Commercial Warranty                  | T-Molding 5/8" x 2" x 72"<br>6AWBV15                             |
| Janka Hardness     |   |  |
| Scale Rating:      | 1790(average)   | Threshold 7/8" x 2-1/8" x 72"<br>6AWBV18                         |
| Adhesive:          | E-1 standards for formaldehyde emissions  |  |

**Environmental Information**

Environmentally friendly and a high-yield 100% rapidly renewable resource, releasing 35% more oxygen than equivalent stands of trees.

- Bamboo is derived from a plant, not a tree, called Mao Shu or "Hairy" bamboo, the hardest of all tall grass species.
- Bamboo is the fastest growing canopy for the re-greening of degraded lands.
- Bamboo stands (forests) mature in three years, and regenerate without the need for replanting.
- Harvested by hand within five years, the natural canopy and canopy inhabitants are not disturbed.
- Naturally resists odor, bacteria, mildew, and insects.
- Second only to concrete for strength and ranked first for stiffness (compared on a mass-per-volume basis to concrete, steel, and wood).
- Compared to hardwood bamboo creates a greater yield of raw material usage.
- Bamboo is a rapidly renewable resource and adhesives used in the manufacturing process have virtually no formaldehyde.
